Ruby on Rails

Erb

MVC

Agile Development

SQL

Postgresql

HTML

CSS

Sass

JavaScript

jQuery

Test Driven Development

Problem Solving

Communicating

Team Building

Researching

Troubleshooting

Training

PROFESSIONAL ACCOMPLISHMENTS

Worked in a Team of Ruby on Rails Developers. Using github the team created a silent auction web application using Rails 5.0, Ruby 2.4, bcrypt, OmniAuth, and Shrine. Using Agile Development we delivered a mvp with time to spare. **Result:** Delivered a customizable web application that could be used at any number of Fundraising Galas. The client was pleased.

Built MacDonald's computer support team. Company received new computer support contract for all MacDonald's using IBM machines. Built team, wrote procedures, and trained all the technical support members from scratch. **Result:** From day one, computer support was flawless. MacDonald's loved it.

Team Member of the first PricewaterhouseCoopers (PwC) virtual private network support team. The company landed the contract without any experience whatsoever. Researched, trained and coordinated this monumental task from its inception. **Result:** Our support allowed the first high-speed internet access to company servers on an international scale.

PROFESSIONAL EXPERIENCE

Ruby on Rails Program Graduate, The Iron Yard

March 2017 - June 2017

- Attended 12-week intensive back-end engineering course designed to give the students the tools and experience needed to enter a career as a junior web applications developer

Sherilyn A. Moline
